### DSDM Atern Practitioner: 3 Days (accredited training course)

Successful adoption of Atern requires an understanding of the individual components of Atern, together with an understanding of how they fit together, complementing one another to provide a strong and robust but flexible agile project framework. This strength is particularly important for successful agile within the corporate environment, where projects are delivered into more complex technical platforms. Atern offers a single approach that can be scaled up to deliver complicated agile solution, or scaled down to provide a adaptable framework for very short timeframe, simple agile projects.

This course provides delegates with training in the Atern framework, and provides guidance on how the delegate's skills might be applied on an Atern project. At the end of the training, delegates should have a detailed understanding of all the component parts of Atern and how they work together to support Atern as a whole. Delegates will also gain practical experience of Atern, through a series of exercises designed to reinforce the concepts of Atern and how it is used to resolve practical issues.

#### Audience

This course is aimed at those intending to take an active role in an Atern project. It is a non-technical course and is equally valuable both for business, management and technical roles.

#### Content

##### Atern Fundamentals

- What is Atern?
- Benefits of Atern
- When to use Atern
- Preparing for successful Atern
- Atern Philosophy and Principles

##### The Atern Process

- Framework and Lifecycle
- Configuring the Lifecycle

##### Atern Products

- Management
- Business
- Technical

##### Atern People

- Roles and responsibilities
- Empowerment
- Team structure

##### Atern Core Practices

- Facilitated Workshops
- MoSCoW Prioritisation
- Modelling
- Iterative Development
- Timeboxing

##### Management and Control in Atern

- Planning
- Risk
- Estimating and Measurement
- Configuration Management

##### Other Areas Impacted by Atern

- Agile Requirements
- Testing
- Quality
- Maintainability

#### Additional Details

**Duration** 3 days (This is an accredited training course)

**Setup** Laptop projection; flip charts; U shape room layout; space for groups of three or four to work together in comfort.

**Options** This course can be tailored to emphasise, discuss and address the specific challenges faced within an individual organisation.
